Weems & Plath To Be Exclusive Distributor Of The Mintaka Duo Barometer!

January 21, 2016, Annapolis, MD — The Mintaka Duo barometer is manufactured in the US by Mintaka Instruments, LLC and exclusively distributed by Weems & Plath. Its unparalleled precision makes it the perfect companion to any individual or organization who relies heavily on accurate weather routing and forecasting information. Its compact size (4"x4") is ideal for marine navigation; but beyond its nautical application, this state of the art electronic barograph is also the perfect solution for any application that requires dependable, accurate barometric pressure, such as small airports and agricultural markets. It interfaces with computers (Mac or PC) for enhanced graphic display, control, and data export. The Mintaka Duo includes many features of barometers used by weather professionals that are priced up to five times more.

This barometer's precision is derived from dual sensors, which collect and average two streams of data. It provides both a large digital pressure display, visible across the cabin or wheelhouse, and a separate "intelligent display" screen displays a versatile graph of pressure history. The scale adjusts constantly to show only the active min/max. The range of the history graph can be adjusted from 30 minutes to 4 months.

The Mintaka Duo also includes an extremely precise clock, using a time chip with guaranteed accuracy within 5 seconds per month. It includes other unique features such as arrows summarizing trends, automatic logging of synoptic-time pressures

crucial for weather analysis, and display of the “Pressure Tendency Characteristic Code” symbols which are found on weather maps and considered the world standard by national and global weather organizations.

“We are excited to add the NEW Mintaka Duo Barometer to our extensive line of weather instruments because it is the most accurate recording barometer available,” says Peter Trogon, President.

Mintaka Duo Barometer

Item # 1942

Suggested Retail Price \$595.00
